ADVANCED EXCEL

Practice Set: Cell References Using Excel

Database 1:

1. **Calculate Discount and Paid Amount**
    - Apply the following formulas:
        - **Discount** = 10% of Actual Amount
        - **Net Amount** = Actual Amount – Discount
    - Enter the formula in the first row and use **AutoFill** to apply it to the remaining rows.
2. **Apply Formula Across a Range**
    - In cell **L3**, enter the formula as per the requirement and **AutoFill** the formula across the range **L3 to N6**.

Database 2: Summary and Tax Calculations

1. **Quarterly Total Sales by Salesperson**
    - Calculate the **total amount achieved by each salesperson** for the quarter using appropriate formulas in the range **E3 to E7**.
2. **GST Calculation and Selling Price**
    - In the range **J4 to J6**, calculate:
        - **GST Amount**
        - **Selling Price** = Cost Price + GST
3. **HRA Calculation (City-wise)**

- Calculate **City-wise HRA** starting in cell **N5**, applying the appropriate formula only in **N5**, and then **AutoFill** across the range **N5 to L8** using absolute or mixed references as needed.

Database 3: Comprehensive Business Calculations

1. **Sales and Tax Calculations**
   - Calculate the following using appropriate formulas:
     - **Amount**
     - **GST Amount**
     - **Selling Price**
2. **Profit and Manager's Commission**
   - Compute:
     - **Manager's Commission** = 5% of Net Profit
     - **Net Profit** = Revenue – (All Expenses + Manager's Commission)
3. **Sales Performance Analysis**
   - Calculate the **Sales Percentage Achieved** by each salesperson in the range **Y6 to Y10**.
4. **Department-wise Bonus Percentage**
   - Compute **Bonus Percentages** applicable to each department in the range **T17 to X24**.

Total Sales Quantity Summary

You are provided with the **sales quantity achieved by each salesperson** for different products during the first quarter.

Skillspark

Your task is to calculate the **total sales quantity** for each salesperson in the **‘Total’** sheet using appropriate cell references and formulas.
