ADVANCED EXCEL

Practice Set: Conditional Formatting in Excel.

Task Instructions:

You have been provided with an employee database. Perform the following formatting and calculation tasks:

1. Open the database and apply borders to the entire data range.
    - Use **thick red borders** for the outside edges of the table.
2. Freeze the **header row** to keep it visible while scrolling.
3. Format the header row as follows:
    - Set the **font** to **Segoe UI Emoji**.
    - Apply **italic style**.
    - Use a **light fill color** (e.g., light grey or pastel).
    - Set the **font color** to **blue**.
4. In **cell M7**, calculate the **total salary paid** to all employees.

- Highlight all employee names having last name as “Brown” with yellow fill.
- Highlight top 5 salary columns.
- Apply star ratings to show performance rating from 1 to 5.
- Highlight duplicate names or names that are repeated.
- Apply data bars to visualize salary differences.
- Highlight the row that contains name” Michael Davis”
- Highlight all employees with a salary greater than $100,000.
- Highlight employees who have taken more than 25 leaves.
- Use a 3-icon set on "Experience (Years)" where green indicates >20, yellow for 10–20, red for <10.
- Highlight second highest salary in the list.
- Highlight second lowest performance rating.
- Highlight employees whose salary is >80000 and experience is <5 years.
- Highlight employees either from IT or Finance department.
- Highlight employees in HR department who took more than 20 leaves.
- Highlight the rows in such a way that when you provide a department name in cell L3, the respective row gets highlighted.
